

SDGs Initiatives

『7 :AFFORDABLE AND CLEAN ENERGY』

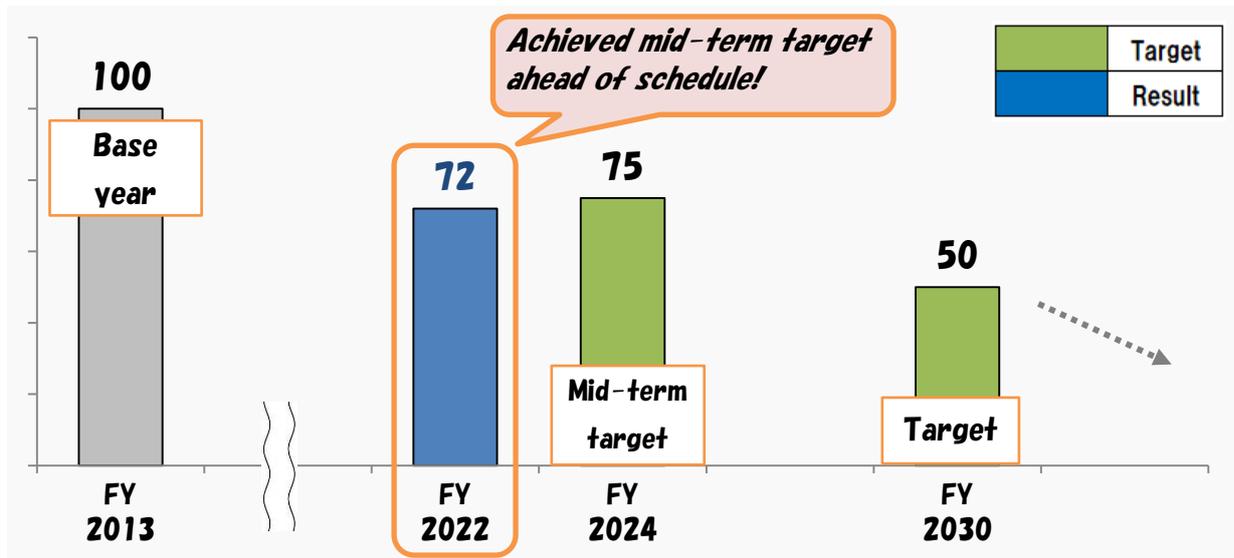

『13:CLIMATE ACTION』

Target :Reduce CO2 emissions by **half (50% or less)** of fiscal 2013 levels by 2030.
Mid-term target :Reduce CO2 emissions by **25%(75% or less)** by 2024.
 OKAJIMA PIPE will promote actions in accordance with the targets set by the government.

1. Targets and results

CO2 emissions in FY2013 are set to 100.

2. Our Initiatives

*Production equipment ... Reduction of energy usage

- More efficient steel tube welding machine
- More efficient pumps and compressors
- Production transfer to more efficient facilities
- More efficient motors and transformers
- Use of LED for factory lighting

*Company-owned vehicles ... Reduction of fossil fuel usage

- Introduction of HEV and PHEV
- Introduction of BEV
- Introduction of FCEV

*Common facilities ... Utilization of renewable energy

- Installation of solar panel (August, 2022)
- Installation of storage batteries (September, 2022)
